

## **MEN spring/summer 2010**

MILESTONE is the specialist for sporty leather and textile jackets. This season **leather** is the absolute “must have”. Intensive colours in crushed yellow, green and blue shades via russet shades up to a powerful red lend the collection expression and attention. The preferred types are short jackets in bomber and biker styles rounded off by sporty suit jacket models. You can clearly see MILESTONE’S outstanding flair for premium leather qualities in the collection. Special effects are created by very strongly washed leather, partly garment-dyed and elaborately finished leather with hand oiled details.

In the **Textile Segment** the collection consists of a multitude of variations on the theme of subtly worked suits and field jackets. The MILESTONE programme is rounded off with short Caban shapes that play with maritime flair. The materials used are slightly waxed, washed nylon qualities, partly waxed cotton and with shape memory qualities. Similar to the leather segment the emphasis is on colours. Strong blue combined with a little orange, yellow via stone colours and beige shades have a high expressiveness. Black also allows the jackets to make a clear statement.
